## **Infinite Campus Releases 2007.1 District Edition System**

October 3, 2006 - Arden Hills, Minn., – Infinite Campus, Inc. today announced the release of the Infinite Campus District Edition 2007.1 student information system. The Infinite Campus District Edition provides administrators, teachers, parents, and students with a comprehensive, web-based educational management system.

The Infinite Campus District Edition helps administrators eliminate islands of information, improve data gathering and management, and provide secure, real-time access to data. It gives teachers an easy-to-use integrated tool for managing their classroom including attendance, grade book and lesson planning. With the district edition, parents and guardians are partners in the education of their students when districts use the integrated communication tools including the web-based portal, email and voicemail messages.

The latest release of the system will provide current customers with additional workflow efficiencies, streamlined data entry processes and learner plan enhancements. New Infinite Campus District Edition 2007.1 features include:

- Individual editors to customize the order and printing of student data used in learner planning
- Built-in federally compliant special education plans and evaluation documents so districts can tailor learner plans to meet their specific needs
- A step-by-step ability to enter demographic data and manage households through the Campus Census wizard reducing the creation of duplicate records
- The ability to quickly edit all household relationships on one screen through the Campus Census relationships editor
- Clear identification of remaining actions needed for each student to complete enrollment
- A school choice enrollment option using district-defined parameters which can be offered via the Campus Portal for online registration
- Five additional Campus Food Service point-of-sale editors have been added to streamline data entry and management, an automated PIN generation features have been added, as well as elementary teacher breakfast or snack item tracking

“This release is focused on providing additional workflow and data entry efficiencies for all users,” stated Charlie Kratsch, founder and CEO of Infinite Campus. “With these latest improvements, administrators, teachers and staff can spend less time with data entry so they can spend more time with their students.”

### **Infinite Campus District Edition**

Administration - Infinite Campus provides administrators, teachers and staff with the tools needed to effectively manage students. Student administration features help automate and manage K12 education processes.

- Census
- Enrollment
- Attendance

- Behavior
- Health

Curriculum - Infinite Campus provides a variety of curriculum planning and management tools for setting standards, managing courses, and effective scheduling.

- Standards Management
- Course Catalog
- Online Registration
- Graduation Planning
- Scheduling

Instruction - Infinite Campus believes all students are special and each deserves an individualized education to meet their unique learning needs. Instruction gives teachers an easy-to-use, completely integrated set of tools for managing their classroom and helping them to focus on each student.

- Individual Learning Plans
- Special Education
- Lesson Planning
- Seating Charts
- Grade Book
- Assessment

School Services - Streamline school service functionality to improve the efficiency of managing daily operations.

- Fee Management
- Locker Management
- Food Service

Communications - The importance of strong communication with stakeholders is important to the success of students. This gives parents access to their student's assignments and grades so they are better informed to help them succeed while being more prepared at conference time. Communication tools that alert parents of school closings, attendance issues or certain behavior also contribute to the success of the student.

- Parent/Student Portal
- Email and Voice Messenger
- Mobile Device Support
- Form Letter Wizards
- User Notices

Reporting - Use your data to populate standard reports, build customized ad hoc reports with user friendly wizards and leverage the integrated state reporting capabilities. And with SQL Reporting Services your district can leverage your Infinite Campus data to generate customized reports to meet specific needs.

- Standard Reports
- Ad Hoc Reporting
- SQL Reporting Services
- Integrated State Reporting
- NCLB Reporting

Analysis - Leverage the data being managed across the district for real-time decision making. The data managed within the system is stored as its own data warehouse providing districts with the built-in ability to analyze data through an easy-to-use Web interface.

- Data Warehousing
- Data Analysis

**About Infinite Campus**

Infinite Campus has successfully implemented its solutions for customers of all sizes. Today, Infinite Campus applications manage more than 1.5 million students in 23 states. Infinite Campus customers range from districts with fewer than 100 students to those with more than 100,000, as well as regional consortia, state departments of education, and the federal government.
