Greeley-Evans School District 6 Selects Infinite Campus as their Student Information System

April 26, 2007 – Arden Hills, Minn., – Infinite Campus, Inc. announces that Greeley-Evans School District 6 selected Infinite Campus as their district-wide student and education process management system.

“We are pleased that Greeley-Evans School District 6 has joined the growing number of Colorado districts using Infinite Campus,” said Charlie Kratsch, founder and CEO of Infinite Campus. “The district will benefit from one system providing a comprehensive set of tools from grading, scheduling and state reporting, eliminating the need to manage multiple third-party systems.”

Greeley-Evans’ student information system was 24 years-old and had 13-14 third-party systems managing complex processes, such as state reporting. Infinite Campus works closely with the Colorado Department of Education to respond to the state requirements by providing districts like Greeley-Evans built-in Colorado state reporting.

Another attractive feature for Greeley-Evans is the ability of Infinite Campus to put information at the fingertips of teachers and administrators. Infinite Campus student data is managed through a centralized database providing real-time information to those who need it, giving Greeley-Evans tremendous potential.

“We wanted one, central, integrated data management system and found Infinite Campus to be the best choice,” said Wayne Eads, Greeley-Evans’ Chief Operations Officer. “We are looking forward to using a true web-based system. In addition, Infinite Campus scheduling capabilities will save us hours of time and the Campus Portal is extremely important for communicating with parents and guardians regarding their students.”

Computer Information Concepts, Inc., (CIC) is a channel partner for Infinite Campus based in Greeley, and has an eighteen year working relationship with the Greeley-Evans School District.

“We are pleased that our hometown district is joining the other 58 Colorado districts that have selected Infinite Campus,” said Steve Bohlender, CIC Executive Vice President. “Our long-term relationship with Greeley-Evans and our knowledge of Colorado K12 education will assure a smooth implementation delivered on time and on budget.”

Greeley-Evans School District 6 plans to go live with Infinite Campus in February 2008.

About Greeley-Evans School District 6

Greeley/Evans School District 6 provides public education for Greeley and Evans, including three high schools, four middle schools, 17 elementary schools, four alternative schools, and three charter schools, with a student population of about 18,500. Their mission is to educate all students in a nurturing, challenging, safe, disciplined environment so their performance is a credit to themselves and society. www.greeleyschools.org

About Computer Information Concepts, Inc. (CIC)

CIC was organized in 1981 to assist school districts, cities, counties and state governments with the acquisition, implementation and effective use of automation. CIC selected Infinite Campus as our preferred K12 student management solution. CIC also provides financial and human resource management and assessment analysis for software for K12 school districts. www.cicesp.com

About Infinite Campus

For more than 13 years, Infinite Campus has successfully implemented its solutions for customers of all sizes. Today, Infinite Campus applications manage more than 1.5 million students in 23 states. Infinite Campus customers range from districts with fewer than 100 students to those with more than 100,000, as well as regional consortia, state departments of education and the federal government. www.infinitecampus.com
