**Infinite Campus Builds for the Future**

**Sept. 28, 2007, Arden Hills, Minn.** – Today Infinite Campus celebrates the groundbreaking of its new national headquarters in Blaine, Minn. The \$20 million, two-story, 110,000 sq. ft. building will accommodate future growth due a rapidly increasing customer base.

“Our national headquarters reflects our future,” said Charlie Kratsch, Founder and CEO. “It will be a place for the creative development and support of our product to respond to the changing needs of education. It will also become a destination for educators from around the world to learn about the product and how to leverage Infinite Campus to transform K12 education.”

Infinite Campus is the largest American-owned student information system for K12 education, serving more than 2.5 million students in 41 states. Currently, Infinite Campus employs 150 people. When it moves into the new building in summer 2008, employee projects reach 200.

For more than a decade, Infinite Campus has provided districts, regional consortia, states and the federal government with an integrated, web-based student information system so educators, parents and student have access to information, increase communication and ultimately improve student achievement.

“We, at Infinite Campus, believe that K12 education exists to serve its customer, society,” said Kratsch. “We also believe that information technology is the catalyst that will transform education, as it has other sectors of society. We’re ready to make this change a reality.”

Having mastered the art of student data management, the vision of Infinite Campus is to now use technology to individualize instruction, so every student can be fully engaged in learning. The construction of the new Infinite Campus headquarters is the next step to reach this goal.
