Computer Information Concepts (CIC) Expands Infinite Campus in Iowa and Illinois

Dec. 17, 2007 – Arden Hills, Minn. – Infinite Campus announces that Computer Information Concepts, Inc. (CIC), in Greeley, Colo., will provide sales and support to customers in Iowa and Illinois. CIC has been an Infinite Campus Channel Partner for three years, managing accounts in Colorado, Missouri, Kansas, Nebraska and Wyoming. In addition to offering Infinite Campus as the preferred student information system, CIC provides financial and human resource management and assessment analysis software for K12 districts.

“CIC is one of our most trusted and valued partners and I am excited for Iowa and Illinois customers (existing and new) to take advantage of the depth of experience, staff and commitment to K12 education that CIC brings to the table” said Dan Orlando, Infinite Campus Alliance Manager.

Campus customers in these states have already had an opportunity to meet with CIC staff. Over the next several weeks, there will be additional opportunities to meet project managers, learn processes and get questions answered.

“I have been impressed with CIC in the short time I’ve worked with them,” said Craig Barnum, Director of Information Services, College Community, Iowa. “They are very organized and responsive to customers. All the Iowa districts with which I have visited are very excited about the 24/7 support model that CIC offers.”

Districts in Iowa and Illinois already using Infinite Campus know the benefits of the Campus web-based, integrated system. CIC will continue to support them in their goal of transforming K12 education™.

“We welcome the Iowa and Illinois Infinite Campus customers to the CIC family,” said Steve Bohlender, CIC Executive Vice President. “We have been pleased with the positive response we have received from these customers to date, and look forward to partnering with them, increasing their utilization of Infinite Campus with our Peopleware services (account management, implementation, training, technical and support) , as we have achieved in other states. We also look to expand our presence in Iowa and Illinois with sales of Infinite Campus to new customers.”

K12 education in Iowa and Illinois will benefit from the innovative technology of Infinite Campus and the personal and professional services that CIC will provide. This partnership will allow districts to be leaders in making data-driven decisions that improve education.

About Computer Information Concepts, Inc. (CIC)

CIC was organized in 1981 to assist districts, cities, counties and state governments with the acquisition, implementation and effective use of automation. CIC offers Infinite Campus as its preferred K12 student management solution, as well as providing financial and human resource management and assessment analysis software for K12 districts. www.cicesp.com

About Infinite Campus

For more than 13 years, Infinite Campus has successfully implemented its solutions for customers of all sizes. Today, Infinite Campus applications manage more than 2.5 million students in 43 states. Infinite Campus customers range from districts with fewer than 100 students to those with more than 100,000, as well as regional consortia, state departments of education and the federal government.
