Moreno Valley USD Selects Infinite Campus for Student Data Management

March 18, 2008– Arden Hills, Minn. – Moreno Valley USD, in Southern California, has selected Infinite Campus as their district-wide student data management system. Serving a student body of more than 37,000 students, the Infinite Campus District Edition will give them the tools needed for real-time, data-driven decisions. Formerly using SASI, Moreno Valley was pleased to see a product that could meet their needs today and into the future.

“We need a centralized data management system that uses a single source data entry method to track student assessments, improve our state reporting process, and increase administrator and teacher productivity,” said Aaron Barnett, Moreno Valley’s Director of Information Systems. “After reviewing several different products, the committee overwhelmingly chose Infinite Campus. It is a well-designed, well thought-out product.”

There were several attributes that set Infinite Campus above the competition. One was the user-friendly interface, providing intuitive navigation for users of all levels. “Also, we loved the Campus Scheduler,” said Aaron. “The electronic whiteboard and master schedule builder were far superior to what we have seen in other products.”

Infinite Campus is a fully integrated system streamlining educational processes and improving communication between the district, student, and parent. The Campus Portal provides secure, real-time access to district information, student assignments, grades, cafeteria, IEP’s, and attendance that can be accessed anywhere, at any time by parents and students.

“Moreno Valley wanted a vendor at the forefront of technology as it changes,” said Ashton Faires, Infinite Campus Western Regional Sales Manager. “After a detailed selection process lasting nearly two years they are confident in their decision to select Infinite Campus. As the largest American owned student information system provider, Infinite Campus is focused on the future of K12 education and assisting districts, like Moreno Valley, achieve their goals.”

Infinite Campus has a growing presence in California and a 14-year history of implementation success with districts of all sizes across the country. Moreno Valley will go-live on August 11, 2008 and has already been working closely with Infinite Campus successfully on implementation planning.

About Moreno Valley USD

Moreno Valley USD is a K-12 school district serving over 37,000 students in Riverside County, CA. Moreno Valley Unified School District's mission is to prepare all students academically and socially to become productive members of society. Moreno Valley USD believes in its core values that all people are created equal and have unique gifts to share with the world. There is strength in diversity and knowledge is power. The family is the child's first and foremost teacher and learning begins and continues within the family. Individuals are responsible for their own actions and accomplishment is its own reward. Individuals, working with and contributing to others, create a true sense of community. It takes an entire community to raise a child. The respect for others creates harmony and the pursuit of

excellence is worth the effort. Before learning can take place, a child's basic needs must be met; and finally education is a partnership among family, the school and the community.
