Three Virginia Districts Select Infinite Campus for Their Student Information System

March 9, 2009 – Blaine, Minn. – Three districts in the state of Virginia have selected Infinite Campus as their district-wide student information system (SIS). Dinwiddie, Floyd, and Halifax County Public Schools will be implementing Infinite Campus District Edition, a comprehensive, web-based system that streamlines administrative processes and provides secure, real-time access to data.

“We are pleased these districts chose Infinite Campus,” said Bob Sills, regional sales manager. “Their leadership will demonstrate the forward-thinking value of Infinite Campus. As early adopters in Virginia, these districts will be able to leverage resources, meet educational needs and prepare for the future.”

When the Commonwealth of Virginia released the approved SIS vendor list, Dinwiddie was eager to find an SIS that could incorporate its many isolated systems.

“We had six different programs that ran together. We wanted a system that had all these in one package,” said Timothy Ampy, Dinwiddie’s Director of Technology. “We considered everything that Infinite Campus brings to the table, not just price. Our committee agreed Infinite Campus was the best system to meet our needs.”

First-time users in a state find that Infinite Campus provides state reporting capabilities and responds quickly to these ever-changing requirements. Across the country, first-time districts benefit from the fully integrated functionality and centralized database.

“The integrated state reporting component of Infinite Campus is very appealing. We want to streamline all our programs and be more efficient in managing the district,” said Melanie Stanley, Halifax’s Director of Academics. “In addition, Infinite Campus allows our administrators and educators to access necessary data quickly, and in real time, to make better informed decisions.”

Also, responsive customer service and support was important to these districts.

“Infinite Campus staff keeps us informed every step of the way, have returned calls promptly, and have had great patience with us as we begin the conversion process,” said Dr. Linda Petrie,

Floyd's Director of Instruction. "We look forward to not only the excellent software package but to working with a company that offers quality support."

These three Virginia districts join a national community of Campus Users and plan to go live by the end of summer 2009.

About Dinwiddie County Public Schools

Dinwiddie County Public Schools, serving 4,500 students, has been recognized by the Southside Virginia Regional Technology Consortium as a state model for educational technology. In the fall of 2008, its School Division won the state SVRTC Technology Award. Dinwiddie recently constructed two new schools – Dinwiddie High School, our new 1600-student school which opened September 2008, and Sutherland Elementary, a new 600-student elementary school which opened in January 2008.

About Floyd County Public Schools

Floyd County Public Schools is located in rural Floyd County, Virginia. There are four elementary schools and one high school serving 2042 students in grades prekindergarten through 12. The division is committed to excellence in education, equality of educational opportunity and the recognition of each student's individuality. www.floyd.va.us

About Halifax County Public Schools

Halifax County, located in Southern Virginia, has 6,100 students. It has seven elementary schools (grades K-5), one middle school (grades 6-8), one high school (grades 9-12) and two early learning centers. Each school is accredited by the Southern Association of Colleges and Schools and is staffed by professionally licensed teachers and administrators.
