Franklin Township Selects Infinite Campus to Meet Its Growing Information Needs

March 16, 2009 – Blaine, Minn. – **The Franklin Township Community School Corporation** in Indiana has selected Infinite Campus as its district-wide student information system (SIS). Because the district has faced substantial growth over the past few years, it needed a comprehensive, web-based system that streamlines administrative processes and provides secure, real-time access to data.

“Franklin Township needed an SIS that could integrate our technology and help us efficiently manage our increased enrollment. Infinite Campus District Edition was exactly what we were looking for,” said Ron Blackgrave, assistant superintendent of operations. “In addition, we wanted an innovative company, poised to meet our needs today, as well as prepare us for the future. Infinite Campus was everyone’s first choice.”

Infinite Campus has a proven record working with districts across the United States. And first-time users in a state find that Infinite Campus provides state reporting capabilities and responds quickly to these ever-changing requirements.

“There is no reason why we shouldn’t be first in the state to use Infinite Campus,” said Blackgrave. “We have great potential here. We are working with a foundation to help develop tools to improve data driven decisions on student progress. Infinite Campus was the only vender that had the data analysis tools we wanted already built into the system.”

Franklin Township, serving 8,900 students, will go live June 2009.

“We are pleased Franklin Township chose Infinite Campus,” said Bob Sills, Infinite Campus Regional Sales Manager. “Its leadership will demonstrate the forward-thinking value of Infinite Campus. As the first district in Indiana to choose Infinite Campus, Franklin Township will be able to manage their growing student information needs and respond to future changes in education.”

About The Franklin Township Community School Corporation
