Infinite Campus Releases Infinite Campus District Edition 2010.1

June 19, 2009 – Blaine, Minn., – Infinite Campus, Inc. ® today announced the release of the Infinite Campus District Edition 2010.1 student data management system. The Infinite Campus District Edition (ICDE) is a comprehensive, web-based system providing secure, real-time access to student data.

ICDE eliminates islands of information and is built upon the idea of data being entered once and is used by many, which in the end streamlines processes across the district. New features for this release includes assessment enhancements, learner plan alerts, Medicaid logging, special education records transfer, employee self service, and expanded staff credential management.

“This release reflects our dedication to streamlining administrative processes,” said Charlie Kratsch, founder and CEO of Infinite Campus. “Each of these new features leverages data managed across a district to simplify workflow, or in the case of special education records transfers the data managed *outside* of the district, so staff can spend more time working with students.”

Highlights of the Infinite Campus District Edition 2010.1 release include:

- Campus Assessments includes new intuitive validations and audits, the ability to calculate proficiency levels based on standards, the capability to import up to four levels/strands, calculate results, and set one test date for all students.
- Campus Learner Planning alerts messages important dates to case managers about a student’s learner plan.
- Campus Medicaid log tracks services provided to eliminate the manual paperwork matching process, improve the accuracy of reports and help districts obtain funding from Medicaid.
- Campus Special Education records transfer includes the ability to import plans, evaluations, progress reports and other associated IEP documents when a student transfers from another district.
- Campus Census Employee Self Service lets district personnel modify their own demographic, employment and credential information with an authorized person accepting or denying changes.
- Campus Census staff data has been expanded to store historical staff data and federal special education-related service credential codes.
- Campus Food Service Point of Sale includes a blind count at the end of the serving period to identify or find over/under amounts by type of payment – coin, check, and cash.

About Infinite Campus

For more than 14 years, Infinite Campus has successfully implemented its solutions for customers of all sizes. Today, Infinite Campus applications manage more than 4 million students in 42 states. Infinite Campus customers range from districts with fewer than 100 students to those with more than 100,000, as well as regional consortia, state departments of education and the federal government. www.infinitecampus.com
