

Streamlining Secure Access

Campus Active Directory uses Lightweight Directory Access Protocol (LDAP) to authenticate against a Windows Active Directory (AD) providing a universal logon to Infinite Campus. Leverage established staff user names and passwords to provide access to Infinite Campus and improving end user productivity.

Use Campus Active Directory to provide secure logon access to the Campus system by leveraging Windows Active Directory.

Integrated Solution

The integration of Windows AD and Infinite Campus reduces system administration's management of multiple security accounts for Campus staff users.

- Manage system security in a centralized location using previously assigned usernames and passwords
- Rely on Campus to provide logon access to the Campus Portal for parents and students
- Simplify the task of adding, modifying and deleting user accounts by managing it through one system

Key Features

- Supports Microsoft Windows Active Directory authentication
- Choose from a variety of options for managing staff and portal accounts
- Simplified configuration interface
- Use distinguished names to fit the organization's naming structure

Leverage your investment in Microsoft Active Directory to manage access to your Infinite Campus system. Learn more by contacting your Infinite Campus representative today.
