

Import Student Data from Feeder Schools and Programs

Reduce the costly process of importing feeder district data with the Campus Student Feeder. Implementing a standardized file layout, feeder districts can export data into a standardized format which can be imported by your district with a few simple steps.

Campus Student Feeder also handles non-standardized data with import mapping capabilities from any source format

Integrated Solution

Take advantage of the data managed by your feeder district to create an integrated student experience from elementary through high school.

- Improve the efficiency of staff and reduce costs by eliminating the transfer of paper-based documentation to support student moves between feeder districts
- Import data from Infinite Campus or third-party SIS systems eliminating errors from inconsistent or missing data
- Reduce the cost and time required to data enter paper-based feeder data files and spend more time focusing on scheduling and counseling incoming students

Key Features

- Use standardized student file import and export format tools
- Format inbound data using customizable import mapping capabilities
- Save import maps for future use
- Import groups of students
- Utilize already familiar import mapping tools
- Identify quickly matched and potential duplicates
- Validate data imported with the included report
- Import preference-based student and state identification numbers
- Bring in state reporting elements

Decrease the security risk of paper-based data transfers and rely on Infinite Campus to import student records. Learn more by contacting your Infinite Campus representative today.
