

Support Mapped Curriculum Using Infinite Campus

Districts can unify a standards-based set of lessons, assessments and scoring criteria using Infinite Campus instructional planning, communication and analysis tools. By providing lesson plans with district-defined curriculum, teachers can focus on customizing instruction to meet the needs of their students.

Pre-populate Campus Lesson Planners based on curriculum maps saving teachers time.

Integrated Solution

Districts can preload templates to support a mapped curriculum which automatically pre-populates the Campus Lesson Planner, eliminating duplicate data entry.

- Create mapped course templates that can be pushed into any district course section with the Campus Lesson Plan copier function
- Pre-populate the Campus Grade Book with assignments, quizzes and examination information
- Review results using embedded Campus Data Analysis

Key Features

- Unlimited number of templates
- Set up term or year-long courses
- Customizable assignment groups
- Define assignment names and abbreviations by district
- Determine grading scale and total points
- Assign due dates
- Provide information to the Campus Portal
- Format text to describe the assignment and learning objectives
- Link to a variety of information including scoring rubric details, district-owned curriculum guides, assessments and online curriculum

Leverage your Infinite Campus investment to map curriculum across the district. Learn more by contacting your Infinite Campus representative today.
