

# Recover Services Revenue

Campus Medicaid provides the mechanism to manage eligibility, track services and log billable services for cost recovery. Reduce paperwork, improve the accuracy of reports and receive the financial reimbursements your district is entitled from Medicaid.

Use data managed across the district to prepare reports needed for billing Medicaid and maintain historical files

## Integrated Solution

The integration of Infinite Campus gives authorized users access to student information to account for services provided.

- Leverage diagnosis and plan data by individual in Campus Special Education and Campus Health Office
- Eliminate duplicate data entry within the system and the need to populate third-party systems
- Log individual services provided to a student and aggregate it for reporting

## Key Features

- Ensure student, service and provider eligibility using built-in compliance logic
- Enter services using a daily log for individuals or in batch entry mode
- Capture all student private insurers
- Track parental insurance carrier verifications
- Associate transportation services for billing
- Access built-in reports including eligibility, provider service log and billable services
- Use ad hoc to generate additional reports
- Archive Medicaid information as a part of the student's permanent record

Use your Infinite Campus system to manage and report Medicaid services. Learn more by contacting your Infinite Campus® representative today.
