

Streamline Open Enrollment

Ease the administration and management of a school choice program with Campus School Choice. Leverage the administrative functionality, built-in workflow, and communication tools within Infinite Campus to automate the application and approval process of an open enrollment program.

The Campus Portal for Parents displays school choice options available so parents and guardians can submit applications

Integrated Solution

Reduce paperwork, simplify communications and streamline the management of open enrollment applications using Campus School Choice.

- Receive electronic application submissions from the Campus Portal and approve, decline, or waitlist it based on district-defined parameters and boundary rules
- Leverage established communication preferences for notification of enrollment status via Campus Messenger
- Provide secure access based on administrative, clerical, parent and guardian roles established through Campus security

Key Features

- Define unique weightings at the building level
- Assign multiple school boundaries to a specific address and/or school
- Automate enrollment acceptance and decline messages to parents and guardians
- Prepare and distribute customized messages for each step of the enrollment process
- Track applications if a student's plans change
- Understand current application status for the entire district
- Administer program level (across multiple schools) or school-level applications
- Leverage projection reporting including enrollment from outside the school boundary
- Automated cleanup after application roll forward
- Manage future enrollments with conflict report

Offer school choice by leveraging your current Infinite Campus investment. Learn more by contacting your Infinite Campus representative today.
