

Centralized Demographic Data

At the heart of Infinite Campus® is its demographic directory structure, Campus Census. It is designed to track every member of your Infinite Campus learning community with complete historical data maintained in perpetuity, if preferred, with even the most complex family structures clearly represented.

Demographics, household, relationships and enrollments are managed from Campus Census.

Integrated Solution

Campus Census is the core repository of Infinite Campus and through its system-wide integration users benefit by entering data only once to be used again and again by all authorized personnel.

- Assign unique student IDs to enable the seamless intra-district, district-to-district and national transfer of student records
- Allow employees to modify demographic, employment and credential information with authorized approval
- Analyze aggregated or disaggregated data as data is managed at the individual level

Key Features

- Tracks racial and ethnicity Federal requirements
- Change household memberships without eliminating historical records
- Assign multiple guardian relationships and contact options
- Search capability to avoid duplications
- Manage household information including home phone number, address, and household relationships
- Generate demographic reports by address, birth date, school boundary or verification
- Create letters for a single household or by guardian
- Assign any combination of phone numbers or email addresses for high priority, attendance, behavior, general and teacher messages
- Track and maintain history of multiple staff credentials including education, licensure, highly qualified and Federal special education codes
- Establish separate tabs using Infinite Campus data to create district-specific elements

Campus Census provides a simplified way to manage your community's demographic data. Find out more by contacting your Infinite Campus representative today.
