

# Services to Meet Your Unique Needs

Infinite Campus is a commercial off-the-shelf system designed so districts and departments of education can use it immediately and extend it to meet unique needs and requirements. To help our customers leverage the system’s extensibility, Infinite Campus provides custom development services by certified technical experts and builds interfaces to third-party applications.

These reports provide a sample of the custom report projects produced to meet specific needs

### Why Custom Development?

As you are being asked to do more with less, Campus Custom Development can help your organization

- Reduce or eliminate redundant data entry by automating data exchange between Infinite Campus and third-party systems such as transportation and library
- Use data visualization for analysis of student achievement
- Integrate custom reports to fulfill district-specific needs

### Custom Development Services

Campus Custom Development can also handle your project needs. This is a sample list of custom offerings:

- Tableau visualization analysis
- Report cards
- Transcripts
- Report building using MS SQL Reporting Services
- SIF Agent setup and support
- Fees consolidation and district-wide fee reporting

### Third-party Interface Subscription

Reduce the re-entry of data and IT management expenses using a custom developed interface to give and receive data with third-party applications. When Infinite Campus or the third-party system releases upgrades, your subscription will keep interfaces current, systems operational, and provide the ongoing support you need.

Ask your Campus Representative for a matrix of third-party exchange capabilities, available report templates, or how Campus Custom Development can help your organization today.
