

Tune Up Data Integrity with a Check Up

Detect costly data entry errors with a Campus Data Health Check. Data entry integrity is especially important with Infinite Campus as data is entered once and used by many across the district to improve student achievement, submit state required reports and parental communications. No matter the size of your district, a Campus Data Health Check can improve data accuracy to save time and money.

The screenshot shows the 'Data Health Check' interface. At the top, it says 'Shows potential problems with the data district-wide.' and '10/28/2009 04:27:17 PM'. The 'Audit Rule Set' is 'Infinite Campus Database'. The 'Output format' is 'HTML'. The 'Save results for future comparisons' is 'No'. The 'Compare to the results saved on' section has two options: 'Fri Nov 20 16:34:13 EST 2009' and 'Wed Nov 04 07:34:46 EST 2009'. A 'Generate Report' button is visible. The 'Summary' table is as follows:

Symptom	Priority	Errors	Total	Error Rate
Students				
Students who have no student number	High	4	6302	0.06%
Students who have the same student number	High	74	6302	1.17%
Active students who have no state ID	High	0	2675	0.00%
Students who have the same state ID	High	86	6302	1.36%
Students who have the same name	Medium	111	6302	1.76%
Students who have no birth date	Medium	13	6302	0.20%

The data health check report returns a "symptom" list with a priority placed on each item and total number of errors identified versus the total number of data elements in the category.

Why Have a Data Health Check?

The same data health check conducted during your district's data conversion is now available anytime through a low cost annual subscription. It can help

- Indicate where data-entry procedures could improve
- Increase state funding due to more accurate reports
- Identify additional training needs for employees

Key Features

- Drill down to supporting information
- Use detailed reports to identify duplicate data entry or missing data
- Roll over symptoms to view quick definitions of each item
- Compare results to previously run data to see data quality trends
- Use issue priority to sequence data cleanup activity
- Employs Infinite Campus security authorization for access
- Unlimited use throughout the year
- Format data in Excel, html, csv and xml

"We see the data health check as an essential report in helping our district meet increasing expectations for accountability, funding, and communications."

Stephen O'Connor, Ed.D.
Director of Instructional Services
Owatonna Public Schools
Owatonna, Minnesota

Use the Campus Data Health Check to clarify or establish data-entry best practices to get the most from your data. To find out more contact your Infinite Campus representative.
