

# Managing the Health Office

Campus Health provides the tools needed to successfully manage a student's health visit, maintain immunization information and distribute medications. Health professionals can schedule student treatments and medication visits while also providing and documenting care for student walk-in visits.

The Health Office Calendar provides a view of the day's appointments with drill down capabilities to the student's individual health record

## Integrated Solution

The integration of Infinite Campus® and Campus Health reduces the amount of time spent managing data entry so more time can be spent on student health-related issues. Health professionals can

- Leverage student data already managed within the system eliminating initial data entry and updating demographic information
- Provide real-time health information to parents and students on the Campus Portal
- Provide alerts to all staff regarding student health-related issues

## Key Features

- Preloaded searchable ICD9 condition codes
- Alert users of immunization non-compliance
- Adheres to state-specific immunization compliance and/or district-defined health requirements
- Expandable interface for immunization data entry and waiver entry
- Leverage over 12 built-in screenings and reports
- Utilize pre-loaded vaccine lists
- Built-in NIC and NOC principles and documentation
- Manage prescription, pharmacy and doctor contacts
- Calculate remaining medication doses automatically
- Manage complaint detail, observations, interventions, treatments and discharge
- Unlimited number of health flags
- Customize and print letters and reports
- Calculate and chart BMI
