

Access Data From Anywhere

The Campus Mobile Interface provides secure, real-time access to your Infinite Campus student data using a wireless mobile device. The Campus Mobile Interface is included at no additional charge with your Infinite Campus system providing authorized users with access to a subset of student data elements anywhere, at any time.

The Campus Mobile Interface ensures security and safeguards student data by providing access to data in real time. This is unlike any third-party system which requires the user to synch and store student data on the device to access it.

Integrated Solution

Use the Campus Mobile Interface to obtain immediate, secure access to Campus data whenever you are away from a desktop or laptop computer.

- Access student data wherever a cellular network is available removing the requirement for wi-fi coverage to support mobile usage
- Take attendance while on a field trip, make behavior referrals from the playground or access a student's emergency contact information in real time
- Use established Infinite Campus role-based security connections and encryptions eliminating the need for multiple user names and password management

Key Features

- Use an Infinite Campus interface tailored for ease of use on the mobile device eliminating the need for additional training
- Display student photos with demographic information to help identification
- Select any student in your system with no limits to the number of students supported
- Use the Sprint cellular network recommended by Infinite Campus
- Supports the Windows 4.0 Mobile Edition or higher, the Palm Blazer 4.0 or higher and the Blackberry 7250 or higher
- Available with Infinite Campus 2006.X and higher

Campus Mobile Interface provides data to users outside the classroom or office. Find out more by contacting your Infinite Campus representative today.
