

Making the SIF Connection

Infinite Campus provides every customer, at no additional cost, a Schools Interoperability Framework (SIF) agent and an embedded Zone Integration Server (ZIS). These free tools can be used to populate a district's third-party SIF compliant applications or seamlessly communicate with regional and state data systems.

The Campus embedded SIF 2.0r1 Zone Integration Server (ZIS) and a SIF 2.0 certified enabled application provides another option to communicate with third-party applications.

Integrated Solution

As the control center for student data collection and management, your Campus data can be used to populate third-party applications providing real-time interoperability.

- Eliminate duplicate data entry and free your staff to spend more time with students
- Ensure data integrity since the data being used by all applications is based on your established Campus policy and procedures
- Reduce the amount of time and money spent managing multiple data sources

Key Features

- Built-in ZIS eliminates the need to purchase a third-party ZIS and associated services
- Request data for a particular set of criteria and timeframe with provided data-scoped zone routing
- Unique embedded zone integration for seamless communications with regional and state data systems
- Delivers library, transportation, human resource, finance and facilities management objects for data exchange
- Supports the SIF and is a SIF 2.0 certified enabled application
- Certified 2.0r1 ZIS by the Schools Interoperability Framework Association
- Member of the Schools Interoperability Framework Association (SIFA)

Infinite Campus provides SIF consulting services to help you determine the best route to use when integrating your data. Find out more by contacting your Infinite Campus representative today.
