

Optimize Resource Utilization

The Campus Scheduler is the tool K12 educators use to undertake masterful scheduling. It delivers a combination of scheduling tools that optimize time, space, motion and people to efficiently leverage limited resources.

The Schedule Wizard uses district-defined rules to quickly set up schedules and test variations in real time

Integrated Solution

Create schedules that leverage the data managed across the system.

- Try any combination of teachers, sections, students and room sizes to optimize the schedule in real time
- Use the course information and numbering sequences established in the course catalog
- Manage individual course requests using the Walk-in Scheduler or online registration via the Campus Portal

Key Features

- Automatic real time student loading
- Use weighted section balancing for gender, minority, discipline and special education balance
- Establish tolerance levels, constraints, priorities, and rules to meet building, school, or district needs
- Ensure numerical balance among course sections
- Drag and drop WYSIWYG interface
- Schedule groups for required courses allowing students to self-select electives
- Establish scheduling rules to accommodate course relationships
- Create departmental schedule worksheets
- Automate gap filling of student schedules
- Set up homerooms in elementary buildings using the manual roster builder
- Address conflicts with built-in exception reports

The intuitive Campus Scheduler optimizes resource utilization in your building, school or district. Learn more by contacting your Infinite Campus representative today.
