Where is Infinite Campus in the next 25 years?

"It has been said that the best way to predict the future is to invent it. When I served as a technology director I saw the power of personalized learning in special education and predicted it would be the future of general education. Our work with competency-based learning and responsive scheduling is moving the market in that direction. Our use of machine learning in predicting and preventing dropouts has shown that we can leverage the massive amount of data we collect to alter student outcomes. We also realize technology is not enough and will continue to work with local schools, educational service agencies, state departments of education and the federal government to develop solutions that make a difference."

Charlie Kratsch, Founder and CEO

Look to the future.

our employees at:
infinitecampus.com/25

"We will have multiple satellite offices across the nation. Each office will specialize in regional demands, yet work continuously to build districts that are 'Campus Champions.'"

Cheril, Support Advisor

"Known as the most desired software company to work for across the nation because of the positive and dramatic impact it has had on children's lives."

Jeff, Chief Technical Officer

"Be the only American-owned SIS available."

Stephanie, Project Manager

"Not only be the #1 SIS in the country, but since we will have colonies on Mars, it will be the #1 SIS in the Solar System."

Josh, Training Specialist

"Campus will see adoption of the Business Administration Suite at a rate equal to what we've achieved with the student information system. In addition, our focused efforts with Teaching and Learning will continue to grow and mature to its place ensuring Campus is the most popular system in the United States."

Dave, Chief Product Officer, Business Administration
