

FOR IMMEDIATE RELEASE

Altus Public School District, Oklahoma, Adds Infinite Campus Business Administration Suite

October 11, 2016 – Blaine, Minn. – Altus Public School District (APSD) chose Infinite Campus Finance, HR and Payroll for their new business administration suite to minimize duplicate data entry and save office resources. The suite will help reduce the district's administrative burden and improve organizational efficiencies.

APSD decided to upgrade after using CIMS for more than 20 years. "Our old business suite had many disconnected components that required significant resources to maintain," said Nancy Goss, Personnel Clerk at APSD. "We look forward to having a business suite that's fully-integrated with our SIS and to seamlessly sharing data across the district."

APSD considered adding the business administration suite after a positive experience implementing the Infinite Campus student information system earlier this year. "We enjoyed working with Campus and received outstanding customer service. Everyone we've worked with has been wonderful," said Goss.

The two, fully-integrated products eliminate the need for third-party systems. "That's what this is all about, we're becoming more efficient district-wide and streamlining processes," Goss said.

Users will be able to enter data through a single point of entry and access real-time information. Data is seamlessly shared between the three modules, which streamline workflows between departments. Goss said the district will utilize the advanced reporting options with built-in state reporting to ensure compliance for the business office. Infinite Campus is an [Oklahoma Cost Accounting System \(OCAS\) Approved Vendor](#).

"We appreciate that Infinite Campus is always developing new technology and advancing," said Goss. "Infinite is the perfect name."

The district is scheduled to go live in July 2017.
