

FOR IMMEDIATE RELEASE

Randolph Public Schools, Minnesota, Selects Infinite Campus

October 27, 2016 – Blaine, Minn. – Infinite Campus was selected by Randolph Public Schools ISD #195 (RPS) as its new student information system (SIS) to personalize learning and increase productivity.

The district began looking for a new SIS after becoming frustrated with the customer support offered by their legacy system, TIES, and the direction the company was headed. “We were seeing a decline in the support process and staffing, which resulted in a delay or no response to questions,” said Michael Kelley, the district’s Superintendent.

Kelley first learned of Infinite Campus during a regional Superintendent meeting when colleagues recommended the SIS. The district reviewed four vendors in total and selected Infinite Campus after live demos showcased the wide range of truly integrated functionality and outstanding customer support options.

“We are looking forward to great customer service. If we have questions, we appreciate being able to pick up the phone and reach out to our local contact for a quick response,” Kelley said.

With a 97 percent support satisfaction rating, Campus Support consistently receives the highest rankings from its customers. The award-winning support staff provides its valued customers with a centralized point-of-contact for responsive, personalized solutions and advice.

The district also highlighted the user-friendly interface and ability to streamline student administration. The SIS serves as a district-wide transactional data warehouse, allowing student data to be entered once and used across the district in real-time. “Among the different systems, we understood Infinite Campus the best,” said Kelley. “It’s straightforward and easy to use. We like that Campus offers all aspects of the student system that we need, in one product.”

The district is scheduled to go live in July 2017.

About Randolph Public Schools ISD #195

Located in southern Dakota County, Randolph Public Schools serves approximately 670 students in one high school and one elementary school. The district has seen enrollment steadily increase for more than 15 years and offers a full range of courses, small class sizes and co-curricular activities.
