

FOR IMMEDIATE RELEASE

Port Edwards School District, Wisconsin, Selects Infinite Campus

May 15, 2017 – Blaine, Minn. – Infinite Campus was selected by Port Edwards School District (PESD) as its new student information system (SIS) for its powerful functionality and to reduce duplicate data entry.

Kyle Cronan, the district administrator and high school principal, said the district's legacy SIS was limited in functionality and prevented them from performing certain tasks. In addition, the district was unhappy with having to purchase tools from third-party vendors to sufficiently manage data. "We had multiple programs to do multiple things," said Cronan.

The district chose Infinite Campus to save resources. "By selecting Infinite Campus, we'll be able to eliminate several of those third-party platforms, and ultimately save the district dollars," Cronan said.

Cronan said they also appreciated the product ease-of-use. "We think the Infinite Campus SIS is extremely user friendly, and the company is very responsive."

PESD also purchased Data Health Check, which detects errors and improves data accuracy, and Food Service, which streamlines cafeteria operations. These Campus Premium Products work seamlessly within Campus SIS, so data is entered once and then immediately available across the district.

Campus customers in Wisconsin receive affordable training, professional implementation and support from Wisconsin Regional Computer Center, a regional partner to Infinite Campus.

The district is scheduled to go live in July 2017.

About Port Edwards School District

Port Edwards school district is located in central Wisconsin and offers a unique and competitive educational opportunity. This small suburban school district has a dedicated staff and an open flexible attitude toward instructional innovation. Port Edwards includes an elementary, middle and high school, and serves approximately 400 students.
