

FOR IMMEDIATE RELEASE

School District of Prescott, Wisconsin, Selects Infinite Campus

May 4, 2018 – Blaine, Minn. – Infinite Campus was selected by the School District of Prescott as its new student information system (SIS) to reduce third-party systems and save resources. Infinite Campus is the state's leading SIS, supporting more than 50 percent of Wisconsin students.

"Infinite Campus offers cutting-edge integrations and features that we need to help manage district resources," said Kyle Flaherty, the district's Director of Information Technology. "We're a small district and cutting down on human work hours with more efficient tools was a top priority."

Since Infinite Campus is an integrated, web-based system, it streamlines administrative tasks and reduces errors. "We're looking to Campus to save us money by eliminating a large amount of manual work, from scheduling to managing curriculum," Flaherty said.

The district also purchased Messenger with Voice, an Infinite Campus Premium Product. Messenger helps schools quickly communicate emergency notifications to staff, students and parents through email, text and voice messages. "We're very excited to use it and experience how responsive and timely it can be," said Flaherty. Premium Products work seamlessly with the Campus SIS so customers can eliminate third-party systems. "It will be nice to bring functionalities under one company's umbrella."

Built from the ground up, Infinite Campus SIS has a multi-tier architecture which supports districts and charters of any size. With more than 200 in-house developers, customers receive free enhancements and peace of mind knowing they have the best educational technology in the industry.

"It's great software and surprisingly, cost effective. Infinite Campus was a logical choice, even for smaller districts," said Flaherty.

The district is scheduled to go live in July 2018.
