**Temecula Valley Unified School District, California, Selects Infinite Campus to Improve Efficiencies**

March 26, 2014 – Blaine, Minn. – Temecula Valley Unified School District (TVUSD), located in Southwestern Riverside County, has selected Infinite Campus for its student information system (SIS). Serving nearly 29,000 students, TVUSD was looking to move from a school-based system to a real-time, longitudinal district-based SIS. As the largest American-owned SIS, Infinite Campus will provide TVUSD with these requirements and more.

“TVUSD prides itself in providing the best systems available for our administrators, staff, teachers, parents and students. The implementation of Infinite Campus continues this commitment to deliver the best systems to our educational community. Infinite Campus will help us streamline our operations, improve efficiency and increase our effectiveness as a district,” says Lori Ordway-Peck, TVUSD Assistant Superintendent, Business Support Services.

The thought of implementing a new SIS can be daunting for some districts; however, TVUSD knows that Infinite Campus has the experience to expertly guide them through a well-managed implementation. With more than 20 years implementing districts of all sizes, Infinite Campus assures TVUSD of a timely and successful adoption of the product. Infinite Campus has a professional staff of Project Managers, Process Consultants, and Data Management teams. In addition, a Client Executive is based in California and dedicated to providing TVUSD with personalized service and support.

“TVUSD looked at the decision to implement Infinite Campus as a stepping stone to eliminate various third-party systems used across the district,” says Ashton Faires, Campus Senior Sales Manager. “The overall goal is to make technology work better for their staff, students and parents, while lowering district costs. Infinite Campus does that by providing a modern system that spans across many areas of TVUSD operations sharing accurate data in real time.

“Over the last two years in California when districts have included demonstrations of Infinite Campus in their RFP selection process, Infinite Campus has been awarded every single contract. TVUSD is a leading district in Riverside County and we are glad to have them join our growing California family.”

TVUSD will have access to award-winning Campus Support Staff and training professionals that provide everything from new enhancement seminars, webinars and onsite training. The Campus Community will also assist TVUSD during their implementation by providing resources for product documentation, videos, simulations and hands on virtual labs. Throughout the implementation and after the project is complete, these tools will continue to help districts learn added functionality and refresh on topics.

TVUSD plans to go live in July 2014.

**About Temecula Valley Unified School District**

TVUSD encompasses 213 square miles in the heart of Southern California wine country. Serving 28,509 students in 33 schools, the mission of TVUSD is to provide high quality teaching and learning for all. [www.tvusd.k12.ca.us](http://www.tvusd.k12.ca.us)
