School District of Prescott, Wisconsin, Selects Infinite Campus Business Administration Suite

July 19, 2018 – Blaine, Minn. – After selecting Infinite Campus student information system (SIS), the School District of Prescott chose Infinite Campus Business Administration Suite to give their district a single solution. The suite (Finance, Human Resources and Payroll) is specifically designed to meet the needs of K12 districts and seamlessly share data across the district in real time.

“After deciding to make the switch to Infinite Campus SIS, choosing to use the Business Administration Suite was a logical choice to help maximize efficiency, as well as ensure data integrity by keeping our data interconnected,” said Kyle Flaherty, the district’s Director of Information Technology. “In addition, the ability to eliminate duplicate data entry for our staff, will be a huge time savings.”

The visibility to information, ease of use, and integration with Campus SIS will increase productivity. Entering grades, viewing a paycheck, or entering a requisition for classroom instructional materials, is all done using the same system, with one login.

“By bringing the Business Administration Suite and SIS under the same vendor, Prescott will improve on a number of operational processes,” said James Rohwer, Infinite Campus Business Administration Sales and Application Specialist. “The integration will help streamline business operations, simplify budget management, centralize employee data, and provide secure access to information across the district. Having one system, and one login, to manage data is just the beginning to a simplified and powerful experience for all employees.”

About School District of Prescott
