

CustomTech Data Visualization

CustomTech Data Visualization is a premium product allowing you to gain insight into all levels of your data. Interactive Data Visualizations are fully integrated into the Infinite Campus interface and are easily shared with staff.

Benefits

- Tightly integrated solution allowing for single sign-on and utilization of Campus security to manage access
- Includes a Template Library of already created visualizations
- Provides a toolset to continue developing visualizations to meet your districts unique needs
- Access to an online forum that has scheduled User Groups and allows for sharing of reports with one another
- Make data analytics available to staff who can make positively impactful decisions

Key Functionality

- Interact and drill-down on your data to see different levels of detail
- Integrated into Infinite Campus using outline links, custom student tabs, building user notices, portal dashboards
- Automatically filter data based on selected calendar, userID or selected course/section
- Simple interactivity allows rapid identification of students
- Easily share intelligence with district stakeholders through Campus integration
