Benefits

Utilize the data managed within Infinite Campus to process, approve, and deny free and reduced meal applications.

- Automate the importing of eligibility status with the Campus Eligibility Import Wizard, which provides a step-by-step process to map and import state direct certification files and eligibility data from third-party systems.

- Parents can submit Meal and Educational Benefits Applications via hard copy or Meal Benefits Applications via the Campus Portal and receive Process Inbox notices indicating the application was submitted and processed.

- Eliminate dual-data entry with household information when processing Meal and Educational Benefits Applications via the Household Application Editor.

Key Functionality

- Create, review and update processed applications via the Household Application Editor.

- Generate batch approval and denial letters with the included templates that are easily customized to meet state and federal language.

- Conduct and report annual federal verification of applications.

- Take advantage of up-to-date federal income guidelines managed by Infinite Campus.

- Improve overall data integrity when using built-in audit tools.

- Complete state reporting of meal status.

- Capture eligibility data year after year automatically, enabling the district to track historical records.
