

Student Information System

Infinite Campus provides districts with the tools needed to streamline student administration, enable stakeholder collaboration and personalize learning. The entire student information system (SIS) is Web-based so educators, parents and students have access to information from anywhere at any time. The SIS serves as a district-wide transactional data warehouse, allowing student data to be entered once and used across the district in real-time, supporting data-driven decision making.

Administration

Effectively manage students and automate K12 education processes with these tools:

- Activities
- After School Programs
- Alert Messages
- Attendance
- Behavior
- Calendar
- Census
- Daily Health Log
- Early Childhood Data
