Q&A

WITH

Chariton Community School District

LOIS DIXON | HIGH SCHOOL REGISTRAR/SECRETARY | CHARITON, IOWA | STUDENT COUNT: 1255

Q **What challenges did your school(s)/district face during COVID? What did Infinite Campus SIS do to help you solve them?**

Answer: "The biggest challenge our district faced was the lack of internet access, even with school-provided hot spots for many of our families. We started out the year with a hybrid schedule and Infinite Campus helped us with scheduling A and B days."

Q **If you were talking to a district using an outdated SIS that is lacking functionality and does not get updated monthly, what would you tell them?**

Answer: "Our district switched to Infinite Campus about 10 years ago and we are still very happy customers. Parts of Infinite Campus do seem complicated to learn, but overall it's a very helpful and usable system."

Q **What would you tell other schools/districts about Infinite Campus' response to COVID? About Infinite Campus the company?**

Answer: "The thing that stands out the most about Infinite Campus to me is the "forward thinking." They are always working on responding to the future of education, caring for the needs of school districts, and providing good and helpful assistance along the way."

Q **Which COVID resources were most helpful and how/why?**

Answer: "Our attendance check-in was super-important, especially if a student was home because he/she was quarantined. Infinite Campus provides a good system where we could look at a student's absence report and easily see the different reasons why the student was absent."

One System

Infinite Campus SIS includes the necessary tools for administrators, teachers, students and parents in a single database – no uploading, downloading or syncing of disparate systems.
